ABOUT

VISION STATEMENT

The vision of the TCTWS is to assure a sustained diversity of wildlife and their habitats in Texas.

MISSION STATEMENT

The TCTWS strives to become the acknowledged source of scientific information and expertise concerning wildlife biology and management in Texas.

The TCTWS participates in a global society in which the conservation of wildlife is a common goal. Wildlife resource decisions are made after consideration of relevant scientific information, in consultation with wildlife professionals, and with the support of an informed and caring citizenry.

2025 ANNUAL CONFERENCE

Wednesday, February 19th through Friday,
February 21st, 2025

Embassy Suites Denton

Our annual meeting is held the third week in February at a selected venue. The venue changes annually to highlight the diversity of ecoregions across the state and maximize membership attendance. This year's meeting will be held in the Cross Timbers and Prairies region at the Embassy Suites Denton in February 2025.

Meeting attendance ranges from 500 to 800 attendees and is student centric. Our annual meeting features 10-15 exhibitors, hosts ~200 oral and poster presentations across 12 bio-disciplines with the majority (~75%) of these presented by undergraduate and graduate students.

The annual meeting features a Plenary Session led by nationally acclaimed leaders, presentations of the latest technology and research, student-focused competitions including Plant ID and Quiz Bowl, multiple professional development workshops and trainings, and countless networking opportunities.
